

Skout AI — User testing guide (Neeraj completed features)

How to use this document: Sign in to Skout as a normal user (owner/admin preferred). Follow each section in order. For every step, mark **Pass** or **Fail** in the checkbox column (print this PDF and tick by hand, or copy into a sheet).

| **App** | <https://www.skoutai.io/app> |

| **API / gateway** | <https://ckoy6iywm0.execute-api.us-east-1.amazonaws.com> |

| **Who should test** | Product / QA / founder with a real workspace |

| **Date** | _____ |

| **Tester name** | _____ |

Before you start

1. Open the app in Chrome.
2. Sign in with your Skout account (Clerk).
3. Confirm you land on the dashboard (no blank error page).
4. Keep this PDF open and tick each step as you go.

Pass criteria for the whole guide: Every *user* step in sections 1–15 is Pass (or marked N/A with a reason). External leftovers at the end are optional.

1. Sign-in & home (smoke)

#	What you do	What you should see	☐
1.1	Go to the app URL and sign in	Dashboard / home loads	
1.2	Click your profile / workspace name in the sidebar	Your workspace is shown	
1.3	Refresh the page	You stay signed in	

2. Onboarding (§8.1)

#	What you do	What you should see	□
2.1	Open Onboarding from the sidebar (or <code>/onboarding`</code>)	Setup wizard / ICP questions appear	
2.2	Fill company / ICP basics and continue	Progress saves; you can finish or skip to the app	
2.3	After finishing, open Discover or TAM	App works with your workspace settings	

3. Discover / TAM / search (§8.2)

#	What you do	What you should see	□
3.1	Open TAM or Prospect search	Search page loads (results or empty state OK)	
3.2	Enter a company / title / filter and search	Results list appears, or a clear “no results”	
3.3	Add one prospect to a list	Prospect shows in that list	

4. Enrichment workbooks (§8.3)

#	What you do	What you should see	□
4.1	Open Enrichment → Workbooks	Workbook list page	
4.2	Create a new workbook and save	It appears in the list	
4.3	Activate it and start a run	Run status moves (queued → running → done/failed)	
4.4	Open the run	You can see rows / progress / errors	

5. Account & Person 360 (§8.4)

#	What you do	What you should see	□
5.1	Open CRM and pick any company (or copy its ID)	Company detail exists	
5.2	Open Account 360 (<code>/crm/360`</code>) and load that company	One screen with deals, activity, signals (or empty sections)	
5.3	Switch to Person mode and load a contact	Person 360 shows contact-centric view	

6. Signals (§8.5)

#	What you do	What you should see	□
6.1	Open Signals	Feed or empty state (no crash)	
6.2	Open one signal if any exist	Detail view opens	

7. Sequences (§8.6)

#	What you do	What you should see	□
7.1	Open Sequences	Sequence list	
7.2	Create a sequence with at least one email/step	Sequence saves	
7.3	Enroll a contact/prospect	Enrollment shows as active / pending	
7.4	Check sequence analytics or enrollments	Counts update	

8. Dexter & Policy Gateway (§8.7)

#	What you do	What you should see	□
8.1	Open Settings → Automation policy (Policy Gateway)	Modes like ask / auto / draft / approve	
8.2	Change one action's mode and save	Setting sticks after refresh	
8.3	Open Dexter (`/dexter`)	Orchestrator page loads	
8.4	Propose / create a GTM plan	Plan appears as pending approval	
8.5	Approve the plan, then invoke	Invoke works after approve (blocked before)	
8.6	Record a learning / outcome if shown	Outcome saved on the plan	
8.7	Open the floating AI chat button	Chat opens; ask "What should I do next?" and get a reply	

9. Decisions (§10)

#	What you do	What you should see	□
9.1	Open Decisions (`/decisions`)	Decision queue page	
9.2	Create a decision from next-best-action (or UI create)	New item in the queue	
9.3	Choose an option or dismiss	Status updates; item leaves open queue	

10. Workflows (§8.14)

#	What you do	What you should see	□
10.1	Open Workflows (`/workflows`)	Workflow Studio / runs list	
10.2	Start a run (enrich/score style if available)	Run appears as running	
10.3	Wait until complete (or mark complete if UI allows)	Run shows completed	

11. LinkedIn (§8.8)

#	What you do	What you should see	□
11.1	Open Deliverability / LinkedIn connect	Connect screen or account list	
11.2	Connect a LinkedIn account (Unipile) if prompted	Account shows as connected / active	
11.3	Add a LinkedIn step to a sequence and enroll someone	Job queued/sent, or a clear "not configured" message	

12. Chrome extension (§8.9)

#	What you do	What you should see	□
12.1	Install the Skout extension (unpacked `store-build` or zip from the team)	Extension appears in Chrome	
12.2	Sign in to Skout in the same browser → open side panel → Connect	Shows you as signed in	
12.3	Open a LinkedIn profile → Add to list	Contact appears in your Skout list	

13. Email intelligence & Warm-Up (§8.10)

#	What you do	What you should see	□
13.1	Open Intelligence → Email	Verify / discover UI	
13.2	Verify a real email address	Result with status (valid / risky / etc.)	
13.3	Open Warm-Up	Page loads (Google/Microsoft connect may still be blocked until OAuth apps are ready)	

14. Calling (§8.11)

#	What you do	What you should see	□
14.1	Open Settings → Calling	Calling settings page	
14.2	Open a contact with a phone number → click Call	Call starts or a clear "calling not configured" message	

15. CRM Intelligence & HubSpot (§8.12)

#	What you do	What you should see	□
15.1	Open CRM → Intelligence	Intelligence views load	
15.2	Connect HubSpot if your workspace uses it	Connection shows as linked	
15.3	Run sync / import if the button exists	Progress or success summary	

16. CRO / reporting (§8.15 / §8.13)

#	What you do	What you should see	□
16.1	Open Admin → CRO (or reporting)	Charts / forecasts or empty states	
16.2	Ask Dexter chat something about pipeline	Sensible reply (not a blank error)	

17. Competitive win/loss (§2) — for GTM

#	What you do	What you should see	□
17.1	Open competitive / win-loss entry (CRM or API-backed UI)	Form or list to add deals	
17.2	Add a won or lost deal (competitor, reason, region)	Deal saves and appears in the list	
17.3	Add until you have 4+ real deals (GTM goal)	Regional TAM unlocks when gate is met	

18. Team & security (as a user) (§11.1)

#	What you do	What you should see	□
18.1	As owner , open Team / invites and invite a teammate	Invite sends / shows as pending	
18.2	As a member (or second account), try an admin-only action	Access denied / blocked — not a server crash	
18.3	Confirm you only see your workspace's data	No other company's contacts	

Optional / external (do not block Pass)

Item	Notes	□
Warm-Up Google / Microsoft connect	Needs Sailesh OAuth apps	
Chrome Web Store public listing	Package ready; publisher submit optional	
Customer SSO (Okta etc.)	Done in Clerk at deal time	
Telnyx number buy / KYC	Done in Telnyx Mission Control, not in Skout
