

Skout AI — AI Features Testing Guide

Step-by-step instructions for Sailesh · Test as a normal app user · August 2026

App URL	https://www.skoutai.io/app
Browser	Google Chrome (recommended)
Account	Sign in with your Skout workspace (owner or admin preferred)
Tester name	
Date tested	

How to use this guide: Work through each section in order. In the **Pass?** column, tick ☐ when the step works as described. If something fails, write a short note in the **Notes** column at the end.

Tip: The round **AI chat button** (sparkle icon) sits at the bottom-right corner on almost every page. That is Dexter — your main AI assistant.

Before you start

#	What you do	What you should see	Pass?
0.1	Open https://www.skoutai.io/app in Chrome and sign in	Home / Dashboard loads (no blank screen or error)	☐
0.2	Look at the left sidebar — confirm menu items load	Discover, Outreach, CRM, Intelligence sections visible	☐
0.3	Refresh the page (F5 or Cmd+R)	You stay signed in	☐

If AI replies are blank or show an error: tell engineering — the server may need an API key configured. You can still test navigation and non-AI screens.

1. Set up your ICP (feeds all AI scoring)

Skout uses your Ideal Customer Profile to score prospects and personalize AI suggestions.

#	What you do	What you should see	Pass?
1.1	In the sidebar, go to Discover → ICP (or Help → Setup wizard)	ICP form with industry, company size, geography	☐
1.2	Fill in your target industries and company size, then Save	Success message; settings stay after refresh	☐
1.3	Go to Discover → Prospect search , search for a job title (e.g. "VP Sales")	Results list or a clear "no results" message	☐
1.4	Click one prospect to open their detail panel	Name, company, and any ICP / score info shown	☐

2. Dexter AI chat (floating assistant)

This is the main AI command bar — available while you work anywhere in the app.

#	What you do	What you should see	Pass?
2.1	Click the round AI button at the bottom-right of the screen	Chat panel opens with a text box and suggestion chips	☐
2.2	Type: <i>"Take me to sequences"</i> and press Enter	App navigates to Sequences, or Dexter gives a clear link	☐
2.3	Open Dexter again. Ask: <i>"How healthy is deliverability?"</i>	A written answer (not blank, not a server error)	☐
2.4	Ask: <i>"Open AI Review"</i>	Navigates to the AI Review page	☐
2.5	Close the chat, go to CRM → Contacts , open Dexter again	Chat still works from the new page	☐
2.6	Optional — voice: tap the microphone icon, say a short question, stop	Your words appear as text; Dexter replies	☐

2A. Create a sequence through Dexter (with safety check)

#	What you do	What you should see	Pass?
2A.1	In Dexter, ask: <i>"Create an outbound sequence called Test Cadence with one email step"</i>	A yellow "Review before executing" box with scope and side effects	☐
2A.2	Click Confirm and run	Success message; new sequence appears under Outreach → Sequences	☐

Note: Step 2A needs the latest app version. If you only get text with no review box, tell engineering to deploy the newest frontend.

3. AI Review — approve AI-written emails before sending

#	What you do	What you should see	Pass?
3.1	Sidebar: Intelligence → AI Review	Queue of drafts, or "nothing to review" empty state	☐
3.2	Go to Discover → Prospect search , open a prospect, find Generate draft (or similar)	Button to create a personalized email draft	☐
3.3	Click generate, then open AI Review again	New draft listed as Needs review	☐
3.4	Open the draft, read subject and body, click Approve or Reject	Status updates; draft moves out of "Needs review"	☐
3.5	Sidebar: Outreach → Draft auto-approve (settings)	Threshold sliders / settings page loads	☐

4. Inbox — AI suggest reply

#	What you do	What you should see	Pass?
4.1	Sidebar: Outreach → Inbox → Conversations	Thread list (or empty state if no mail connected)	☐
4.2	Select any conversation with at least one message	Message thread opens on the right	☐
4.3	Click Suggest reply	AI draft text appears in the reply area (may take a few seconds)	☐
4.4	Edit the draft if you want, then send or discard	Normal send flow works, or clear error if mailbox not set up	☐

5. CRM 360 — AI next best action

AI recommends what to do next for a specific contact or deal, based on real CRM history.

#	What you do	What you should see	Pass?
5.1	Sidebar: CRM → Contacts — pick a contact that has some activity	Contact detail page	☐
5.2	Sidebar: CRM → Account 360	360 view with company / person toggle	☐
5.3	Load your contact (paste ID or search if the page asks)	Deals, tasks, signals sections (some may be empty)	☐
5.4	Find the Suggest next action card and click it	Headline + short rationale (e.g. "Schedule a call because...")	☐
5.5	Click Create task on the suggestion	Confirmation that a task was created	☐
5.6	Optional: choose Enroll in sequence if shown	Enrollment succeeds or clear message why not	☐

6. Decisions — act on AI recommendations

#	What you do	What you should see	Pass?
6.1	Sidebar: Intelligence → Decision views	Open decisions list	☐
6.2	If there is a Create from next best action option, use a contact ID from step 5	New item appears in the queue	☐
6.3	Open a decision, pick an option or dismiss	Item leaves the open queue	☐

7. Dexter Orchestrator — governed AI plans

For GTM actions that need human approval before they run.

#	What you do	What you should see	Pass?
7.1	Sidebar: Outreach → Dexter Orchestrator	Command center with summary cards and plan form	☐
7.2	In the plan brief box, type a goal (e.g. "Enroll high-fit SaaS VPs in a cadence") and click Propose	Plan ID shown; item appears under pending approvals	☐
7.3	Click Approve	Success message	☐
7.4	Click Invoke (only works after approve)	Invoke succeeds	☐
7.5	Click Record learning	Outcome saved on the plan	☐
7.6	Scroll to Recent policy blocks	List of blocks or "no recent denials" (no crash)	☐

8. Policy Gateway — control how autonomous AI is

#	What you do	What you should see	Pass?
8.1	Sidebar: Automation → Policy Gateway	Table of actions with modes: ask, auto, draft, approve	☐
8.2	Change one action (e.g. plan invoke) to approve and save	Setting persists after page refresh	☐
8.3	Change it back to your preferred mode	Saves successfully	☐

9. LinkedIn Voice — AI script for voice notes

#	What you do	What you should see	Pass?
9.1	Sidebar: Outreach → LinkedIn Voice	Voice wizard (steps: pick contact → draft → review → handoff)	☐
9.2	If prompted, connect LinkedIn under Deliverability first	Connected account shown	☐
9.3	Pick an eligible 1st-degree contact and generate a script	AI-written script text appears	☐
9.4	Optional: play audio preview	Audio plays (preview only — not sent to LinkedIn)	☐
9.5	Use mobile handoff (QR code), send manually in LinkedIn app, then confirm in Skout	Activity logged on contact timeline	☐

10. CRO Copilot — executive AI (admin only)

#	What you do	What you should see	Pass?
10.1	Sidebar: Intelligence → CRO Copilot	Pipeline summary cards + chat panel	☐
10.2	Ask: <i>"Which reps are behind on pipeline this week?"</i>	Answer based on your workspace data	☐
10.3	If you have a non-admin test account: try opening CRO Copilot	Access denied message (not a crash)	☐

11. Enrichment & signals (AI context)

#	What you do	What you should see	Pass?
11.1	Discover → Enrichment workbooks — create a workbook and run it on a small list	Run progresses (queued → running → done)	☐
11.2	Intelligence → Signal Center	Signal feed or empty state	☐
11.3	Return to Account 360 for a company with signals	Signals section shows related items	☐

12. Quick 15-minute smoke test

If you are short on time, do only these steps:

1. Sign in → Dashboard loads (0.1)
2. Dexter chat → ask one navigation question (2.2)
3. Dexter chat → ask one product question (2.3)
4. AI Review page opens (3.1)
5. Account 360 → Suggest next action (5.4)
6. Dexter Orchestrator → Propose → Approve → Invoke (7.2–7.4)
7. CRO Copilot → one pipeline question (10.2)

Sign-off
